To:

All,

A quick Cement Creek/Animas update. As we've moved beyond the Site Assessment/HRS phase and into the remedy and feasibility discussions it's time to pass along the Animas baton internally. Carol has instructed that Mike Holmes take over as EPA's project manager in the watershed. Sabrina and Steve have done excellent work over the last several years and are responsible for getting us to the decision point where we (EPA and the community) now find ourselves.

Mike will coordinate correspondence with citizens and elected officials, EPA's participation in ARSG and community meetings, EPA/BLM/CDPHE communications and the R8 internal project team. Mike should be referenced on FAQs/letters/websites/etc. going forward.

Sincerely,

Dan Heffernan
Acting Chief, Brownfields & Site Assessment Unit
